**3pk Indoor Remote Control**

with Single Keychain Transmitter

3-Single Grounded outlet receivers
Transmitter works through walls, windows, and doors. (100 ft Range)
Manual On/Off Override Button
LED power ON indicator
Built in security function with optional transmitter(sold separately)
UL approved for CFL bulbs
Command1 Expandable!

**INSTRUCTIONS**

1. Plug the Remote Base into a 120VAC electrical outlet.
2. Plug your electrical device(s) into the remote base. Make sure that your electrical device is power ON.
3. Use the buttons on the Remote Control to turn your device(s) ON and OFF.
   - **Manual Override:** You can power the unit ON and OFF manually by pressing the ON/OFF override button located on the front of the receiver. (Do not hold the button down for manual ON/OFF operation as this will cause the unit to enter pairing mode.)

**COMMAND 1 TRANSMITTER PAIRING:**

Note: Your Command1 Transmitter and receiver contained in this package are pre-programmed and ready to use. Command1 Pairing is only required for using additional transmitters.

This unit is equipped with patented Command1 technology. All Westinghouse indoor and outdoor transmitters have the ability to be paired with all Westinghouse indoor and outdoor receivers. Please follow the directions below to pair a transmitter to your receiver.

1. Locate the power [ON/OFF] button on the receiver.
2. Press and hold the power button for 3 seconds. The LED power indicator will begin to flash slowly.
3. On your transmitter, press [ON] wait 2 seconds and then press [OFF]. The LED indicator will now stop flashing.
4. You have successfully paired the transmitter to your receiver.

**RESETTING THE UNIT**

You can reset and remove all paired transmitters on your receiver by doing the following:

1. Press and hold the ON/OFF button for 3 seconds. The LED indicator will begin to flash slowly. Continue to hold for an additional 3 seconds. The LED indicator will now begin to flash rapidly. Release the ON/OFF button for 1 second and press once again to confirm reset. The LED indicator should now be OFF.
2. Your unit has now been reset and does not have any paired transmitters. (Note: After reset, pairing is required to use the transmitter shipped in this package.)

**BATTERY INFORMATION AND REPLACEMENT**

The Remote Control uses a 3 volt CR2032 lithium battery. To replace, slide off the battery at bottom side of the transmitter. Insert a new CR2032 lithium battery, making sure to match up the + and – polarity markings. Slide the cover back in. To test, press the ON or OFF buttons to make sure the LED lights up. Do not dispose of batteries in fire. Batteries may explode or leak.

**WARNING**

DO NOT splice, repair or modify. Unplug when not in use. Fully insert plug. DO NOT use damaged remote sets. Inspect periodically. Use within the electrical rating marked on the remote set. DO NOT plug more than a total of 1000 watts in this remote set. If watts are not marked on appliance, multiply ampere rating (on nameplate) by 125 to determine equivalent watts. Add determined watts for each plugged-in appliance or lamp (sum of watts on bulbs) to find total watts being used. Operating temperature range –30ºC (-22ºF) to 45ºC (113ºF). Let the switch hang downward so moisture doesn’t accumulate in the outlet. Install cord and unit above ground level with the receptacle in the downward position. Suitable for damp locations. Not for water immersion or for use where directly exposed to water. Store indoors when not in use.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

- Only use the batteries specified and be sure to match the + and – polarity markings.
- Do not mix old batteries and new batteries or standard (carbon-zinc) with alkaline batteries.
- Remove exhausted or dead batteries from the product.
- Remove batteries if product is not to be used for a long time.
- Do not dispose of batteries in fire. Batteries may explode or leak. As with all small items, these batteries should be kept away from children. If swallowed, seek medical attention immediately.

**Specifications:**

1-Grounded Outlet x 3
120VAC/60Hz/8A/960W Resistive
5A/600W Tungsten
500VA Electronic Ballast
433.98 Hz Frequency

**Troubleshooting Tips:**

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The receiver doesn't turn on</td>
<td>Make sure the AC power cord is securely plugged into an AC power outlet. Unplug the unit for a moment, and then plug it back in again. Check the outlet by plugging in another device.</td>
</tr>
<tr>
<td>The remote doesn't work</td>
<td>Make sure the battery is fresh. Stand closer to the receiver, the range should be up to 100ft. Doors or Walls will reduce the remote distance.</td>
</tr>
</tbody>
</table>
